

Project Case Study

Project Overview

Installation and supply of boom

Project Title

Installation of 1 permanent fence boom

Product / Services

Permanent Fence Boom

Project Undertaken

January 2009

Industry Sector

Power Station

Working For / On Behalf

Client

Overview

Darcy's client, a power station in the UK, required a boom to be installed to capture any debris from entering the water intakes.

Solutions & Savings

- The Boom installed is a permanent fence boom that is installed on the Calder navigation river.
- The boom was installed to prevent debris getting into the water intakes
- This water is pumped through into the power station and is a preventative measure the power station deemed necessary.
